

Aloha ACIP Committee Member,

As the CDC does not provide a personal way to contact you via email, I have taken the liberty to find your professional contact information based upon the information the CDC has provided in your bio on this page: <https://www.cdc.gov/vaccines/acip/members/index.html>

I request responses to the following questions:

What necessity exists to add these experimental biologic products to the children's vaccine schedule while (1) they are still in clinical trial, (2) they have triggered multiple safety signals for children in VAERS including Myocarditis, (3) children under 18 recover from SARS-COV-2 greater than 99.99% according to data published by the CDC through October 20, 2022?

Who pays your salary as an ACIP Committee Member and how much that salary is?

What financial conflicts of interest and other involvements with Pfizer, Moderna, Johnson & Johnson and any of their subsidiaries or business partners are you currently involved in?

[Pfizer Primary Clinical Trial - ClinicalTrials.gov Identifier: NCT04368728](#)

Clinical Trial End Date – **March 15, 2023**

[Moderna Primary Clinical Trial - ClinicalTrials.gov Identifier: NCT04470427](#)

Clinical Trial End Date – **December 29, 2022**

[J&J Primary Clinical Trial - ClinicalTrials.gov Identifier: NCT04505722](#)

Clinical Trial End Date – **March 31, 2023**

[FDA Cormirnaty Approval Letter](#)

<https://clinicaltrials.gov/ct2/show/NCT05295290>

Clinical Trial End Date – **Originally May 31, 2027, Now October 28, 2028**

While I respect you professionally, I am disgusted at your decision to add experimental products, still in clinical trial, and with no long-term safety data, but with VALID existing safety concerns, to an ever-growing schedule that will affect children and families across our nation for decades.

Fools rush in. This appears at best to be foolish, and at worst, part of an all out assault upon our children that you must answer for as appointed public officials. Mahalo.
